DEIVID DA SILVA AFONSO

Fullstack Engineer | .NET · C# · AWS · Angular · React | AI-Augmented Development

Diadema, SP — Brazil | +55 (11) 93233-3534 | deividsa@gmail.com | linkedin.com/in/deivid-da-silva-afonso-dev

PROFESSIONAL SUMMARY

Fullstack Engineer with 7+ years delivering high-performance corporate systems. Backend emphasis: C#/.NET, REST APIs, messaging (RabbitMQ), caching (Redis), cloud infrastructure (AWS) and relational databases (SQL Server, Oracle, PostgreSQL). On the frontend, hands-on experience with Angular and React/Next.js. Actively integrates AI tools — including Claude, GitHub Copilot and LLM-based automations — into the development cycle to accelerate delivery and eliminate manual work. Strong background in Clean Code, SOLID, code review and production support in agile environments. High performance in remote and async work with autonomy and clear goals.

HIGHLIGHTS

- Optimized SQL Server/Oracle procedures and indexes, reducing response times on critical production routines.
- Managed P1/P2 incidents with root cause analysis (RCA) — reduced recurrence and improved MTTR.
- Built async jobs and integrations (Hangfire, RabbitMQ), automating operational workflows.
- Adopted AI tools (Claude, GitHub Copilot) in the development cycle — accelerated delivery and code reviews.
- Hands-on AWS experience (EC2, S3, Lambda, RDS) in professional and personal projects.
- Delivered frontend interfaces with Angular and React/Next.js integrated with custom APIs.

SKILLS

Backend: C#, .NET, .NET Core, ASP.NET Core/MVC, REST APIs, Razor Pages

Frontend: Angular, React, Next.js, TypeScript, HTML/CSS

AI & Automation: Claude API, GitHub Copilot, prompt engineering, AI-augmented development

Messaging & Caching: RabbitMQ, Redis, Hangfire

Cloud: AWS (EC2, S3, Lambda, RDS, CloudWatch)

Databases: SQL Server, Oracle, PostgreSQL — queries, stored procedures, performance tuning

Practices: SOLID, Clean Code, N-Tier Architecture, systems integration, code review, troubleshooting

Tools: Git, Docker, logging & monitoring

Agile: Scrum, Kanban

PROFESSIONAL EXPERIENCE

Basis Tecnologia da Informação S.A. — Software Engineer (.NET) | Mar 2025 – Oct 2025

- Owned the evolution of a corporate C#/.NET system with 50+ modules in a 5-dev team, validating business rules with stakeholders.
- Tuned SQL Server/Oracle queries and procedures, cutting critical report times by up to 70% (from ~30s to ~9s on 500k+ row queries).
- Introduced AI-assisted review (GitHub Copilot) to reduce review cycles and catch regressions earlier.

G4F — Backend Engineer (.NET) | Feb 2024 – Jan 2025

- Optimized 30+ procedures and indexing strategies across 200+ production routines, team of 4.

- Reduced MTTR on P1/P2 incidents from ~4h to under 1h through RCA and structural fixes with improved logging patterns.
- Drove Clean Code/SOLID adoption in code reviews, cutting rework by ~40% measured by rejected PRs.
- Began integrating LLM tools for internal documentation and test case generation.

GovBr — Software Engineer (.NET) | Sep 2021 – Mar 2023

- Built and maintained VB.NET/C# modules for a municipal system used by thousands of citizens, integrating SQL Server with legacy Java APIs.
- Improved delivery speed and system stability for public services in 2-week cycles.

Marcius Magazine — Software Engineer (.NET) | May 2018 – Sep 2021

- Built multi-branch ERP modules with .NET Core + PostgreSQL, integrating 3 marketplaces (Mercado Livre, B2W).
- Automated order and inventory flows, eliminating manual processes.
- Implemented Selenium regression test suite that enabled safe weekly releases.

EDUCATION

Associate Degree — Multiplatform Systems Development | Fatec Diadema | In progress (3rd semester) — Expected: 2028

Postgraduate — .NET Software Architecture | Anhanguera | Completed: Apr 2024

Associate Degree — Internet Systems | Fatec Jahu | Completed: 2020

LANGUAGES

Portuguese: Native | English: Advanced (B2/C1)

ADDITIONAL INTERESTS

Cryptocurrencies and DeFi protocols (personal hyperfocus — daily tracking of on-chain data, tokenomics and market dynamics). Emerging AI/LLM technologies and frameworks. Open source contribution. Remote work culture.
